## Experience

---

### Project Manager

**Autocredit Solution** | January 2023 – Present

- Leading the product management team, coordinating cross-functional resources to deliver innovative financial solutions.
- Managing the full product lifecycle, from ideation and market research to launch and post-launch performance tracking.
- Working closely with the development team to prioritize features, ensure alignment with business goals, and manage delivery timelines.
- Improving customer satisfaction through continuous product updates and agile feedback loops.

### FRONTEND DEVELOPER (Contract)

**XpressScribe** | September 2022 – January 2023

- Built responsive web applications using ReactJS, integrating with PHP-based backend

systems to provide a full-stack solution.

- Worked closely with designers to translate wireframes into high-quality code, ensuring pixel-perfect implementation.
- Utilized JIRA and Notion to manage development sprints, track progress, and maintain clear communication with stakeholders and team members.
- Contributed to the frontend development of several client websites, improving user engagement and page load times through performance optimization techniques.

## WEB DEVELOPER

**Brainac Solutions** / June 2018 – January 2020

- Developed dynamic websites using PHP and JavaScript frameworks, implementing custom features and database interactions.
- Designed and implemented frontend solutions for e-commerce platforms and business websites, improving UI/UX through interactive and responsive design elements.
- Managed version control using Git, ensuring smooth collaboration between frontend and backend teams.
- Regularly communicated with clients to gather requirements and provide updates on project progress.
